Education

- FAST-NUCES — BS Computer Science (2024–2028)
-

Major Projects

1. NovaCare — Hospital Management System(Database Project)

- Developed a full-stack Django web application managing end-to-end hospital operations across four roles (Admin, Doctor, Patient, Pharmacist) with session-based authentication, role-specific dashboards, and a menu-driven interface for appointment booking, consultation notes, and pharmacy billing.
- **GitHub Repo:** [NovaCare Hospital-Management-System](#)

2. AikMarkaz — Web Development Project

- Developed **Aik Markaz**, an API-driven single-page financial dashboard for Pakistan with real-time precious metal prices. Built a 3-page SPA (Markets, PSX, Converter) featuring client-side routing, dark/light mode, and persistent user preferences
- Built a PSX module with 158+ stocks featuring search, filtering, sorting, pagination, and candlestick charts, alongside a currency and metal converter with live PKR rates, unit conversions, and robust multi-API integration with a responsive modern UI.
- **Deployed Project Link:** <https://aikmarkaz.netlify.app/>

3. RepoPilot — A full-stack developer tool for analyzing GitHub repositories, browsing their file structure, and committing new files with AI-suggested destinations.

- Implemented atomic multi-file Git commits via GitHub's Git Data API (blob/tree/commit/ref) with automatic rollback on failure
- Integrated the Anthropic API for AI-generated commit messages and folder-placement suggestions based on repo conventions
- Designed secure GitHub OAuth flow with encrypted token storage and a light/dark theming system
- **Github Repo:** [RepoPilot](#)

4. SpotiML - Ai Song Analyzer —AI/ML Project

- Developed a multi-task machine learning application using 12 classification models across three music prediction tasks
 - Built a Flask-based interface for real-time song analysis and machine learning predictions.
 - **Deployed Project:** [SpotiML.vercel.app](#)
-

Work Experience

Teaching Assistant — FAST-NUCES (Islamic Studies/Ethics & Multi-Variable Calculus)

Sep 2025 – Present

- Checked and graded assignments and quizzes for 50+ students, providing accurate evaluation and feedback.
- Assisted faculty in creating quizzes and assessment materials to support the curriculum.
- Helped clarify students' doubts regarding assignments and quizzes, improving understanding of core concepts.

Social Intern — BHR Welfare Association

May 2025 – July 2025

- Supported the organization of free eye camps and winter clothing drives, assisting doctors, patients, and volunteers to benefit 1000+ people.
 - Helped prepare and track medical check-ups, surgeries, and free medicine distribution, improving reporting efficiency.
 - Assisted in coordinating volunteers and community participation, enhancing the impact of outreach programs.
-

Interests and Extracurricular Activities

Event Organization & Volunteering

- Part of the team that organized an **Anti-Harassment Awareness Session** at the university, coordinating experts from different fields and ensuring the event was successful.
- Served as an **Executive of the EM Tech Team** for **Dev Day**, assisting companies with stall setup and customization to ensure smooth event execution.
- Assisted in organizing awareness campaigns and social initiatives, reaching 1000+ beneficiaries.
- Coordinated with volunteers to improve program efficiency and impact.

Skills

- **Programming Languages:** C++, C, R, Python, SQL, HTML, CSS, JavaScript, React.js
 - **Frameworks & Libraries:** Numpy, Pandas, Matplotlib, Seaborn, Django(Beginner).Flask, n8n Workflows
 - **Tools & Platforms:** Visual Studio Code, Visual Studio, R-Studio, Kaggle, Github, BigQuery, SQL Developer, Jupyter Notebook, Dockers, n8n
 - **Core Competencies:** Data Analysis & Visualization, Object-Oriented Programming, Data Structures & Algorithms, Web Development Fundamentals, AI/ML
-

Certifications

- **Google Data Analytics Specialization** – Google, [Completed July 2025](#)
- **Python for Data Science, AI & Development** – IBM, [Completed July 2025](#)
- **Technical Support Fundamentals** – Google, [Completed July 2025](#)
